

THE EASY & AFFORDABLE WAY to Manage Your Fundraising Golf Tournaments!

DoJiggy Golf is a complete web-based registration and management system for fundraising golf tournaments. Since 2003, DoJiggy has hosted more than 2,000 fundraising golf tournaments.

As with all of DoJiggy's products, your organization's website is easy to create and fully customizable. DoJiggy Golf includes online registration for individual golfers and teams, sponsor promotion and management, and complete event management and reporting capabilities, including team pairing, and detailed order and financial reporting. The administration area provides a complete player database, storing registration information (name, address, phone numbers, payment details, email, etc.), as well as email broadcast and email template capability, allowing tournament directors to easily communicate with registered players, sponsors, or prospective supporters.

We offer two service levels to fit your budget and needs. Our Standard edition includes sponsorship sales and registration for up to 150 golfers. The Professional edition allows your organization to host multi-flight or multi-course tournaments for up to 300 golfers (with additional participant licenses available). Professional subscriptions include three administrative log-ins, online auction functionality, volunteer registration, advanced pricing controls and more.
